Michael L. Zukosky

**Przewalski's Horses in Eurasia: Pluralism in International Reintroduction Biology** Michael L. Zukosky  
*Przewalski's Horses in Eurasia* draws on more than two years of ethnographic research to examine the reintroduction of Przewalski's horses—a highly endangered breed that is a genetically distinct and distant relative of today's domesticated horses—into their native habitats across Eurasia. Zukosky explores how pluralism in species reintroduction provides insights into the experiences, relationships, and knowledge required for future international collaborations to better capture the complexity of both nature and society in scientific practice. The book includes philosophical discussions of pluralism in narrative, ethnographic studies of biologists' observations of changing horse behavior from European captive conditions to release in the wild in Asia, and ethnographic accounts of local non-scientists' sentiments about the benefits and disadvantages of reintroduction in central Mongolia. Recommended for scholars of anthropology and biology.
