Molten Salts: From Fundamentals to Applications (Nato Science Series II:) Marcelle Gaune-Escard

Several state-of-the-art applications of molten salts are presented, such as metal-molten salt systems, room temperature glass formation, and room temperature melts. Several recent examples of applications highlight the importance of molten salts in various industries (batteries, pyrochemical reprocessing of nuclear fuel, synthesis and catalysis). The basic concepts of the structure, dynamics, electrochemistry, interfacial and thermodynamic properties are detailed and relevant experimental methods described. Such fundamental concepts are essential for an in-depth understanding of the physicochemical properties of molten salts in general, including metal-molten salts, glass forming and low temperature melts. Experimental methods for investigating structural, dynamical, electrochemical thermodynamical and interfacial properties are detailed, as also are techniques for data collection and analysis.

Scientists, engineers and technologists will find the volume a valuable reference source covering a wide spectrum of fundamental concepts and modern technologies.

From reader reviews:

Barbara Spangler:

Why don't make it to be your habit? Right now, try to ready your time to do the important take action, like looking for your favorite guide and reading a guide. Beside you can solve your long lasting problem; you can add your knowledge by the book entitled Molten Salts: From Fundamentals to Applications (Nato Science Series II:). Try to face the book Molten Salts: From Fundamentals to Applications (Nato Science Series II:) as your close friend. It means that it can to become your friend when you sense alone and beside associated with course make you smarter than ever. Yeah, it is very fortunated for yourself. The book makes you far more confidence because you can know almost everything by the book. So , let's make new experience as well as knowledge with this book.

Fabiola Gaylor:

In this 21st centuries, people become competitive in each and every way. By being competitive today, people have do something to make these individuals survives, being in the middle of the crowded place and notice by surrounding. One thing that sometimes many people have underestimated it for a while is reading. Sure, by reading a e-book your ability to survive enhance then having chance to stand up than other is high. In your case who want to start reading the book, we give you that Molten Salts: From Fundamentals to Applications (Nato Science Series II:) book as beginning and daily reading reserve. Why, because this book is greater than just a book.

Shawn Stoltzfus:

Precisely why? Because this Molten Salts: From Fundamentals to Applications (Nato Science Series II:) is an unordinary book that the inside of the e-book waiting for you to snap it but latter it will shock you with the secret that inside. Reading this book alongside it was fantastic author who else write the book in such incredible way makes the content inside easier to understand, entertaining way but still convey the meaning thoroughly. So , it is good for you because of not hesitating having this any more or you going to regret it. This amazing book will give you a lot of advantages than the other book possess such as help improving your skill and your critical thinking approach. So , still want to hold off having that book? If I have been you I will go to the publication store hurriedly.

Jennifer Lewis:

Don't be worry when you are afraid that this book will certainly filled the space in your house, you may have it in e-book way, more simple and reachable. This Molten Salts: From Fundamentals to Applications (Nato Science Series II:) can give you a lot of friends because by you considering this one book you have matter that they don't and make a person more like an interesting person. This particular book can be one of a step for you to get success. This e-book offer you information that probably your friend doesn't learn, by knowing more than other make you to be great folks. So , why hesitate? We need to have Molten Salts: From
