The Analysis of Mortality and other Acturial Statistics (Institute of Actuarial Publications) B.
Benjamin, H. W. Haycocks

The second edition of this actuarial text contains new material on demography and population methods. All chapters have been completely updated and a number completely rewritten. A new section on stochastic processes has been added and the treatment of graduation and statistical technique brought into line with modern practice. In this field where mathematical concepts are being applied to mortality analysis, students and actuarial practitioners can find guidance and explanation supported by numerous examples.
