Interactive Operations Research with Maple: Methods and Models Mahmut Parlar

Interactive Operations Research with Maple: Methods and Models has two objectives: to provide an accelerated introduction to the computer algebra system Maple and, more importantly, to demonstrate Maple's usefulness in modeling and solving a wide range of operations research (OR) problems. This book is written in a format that makes it suitable for a one-semester course in operations research, management science, or quantitative methods. A number of students in the departments of operations research, management science, oper ations management, industrial and systems engineering, applied mathematics and advanced MBA students who are specializing in quantitative methods or operations management will find this text useful. Experienced researchers and practi tioners of operations research who wish to acquire a quick overview of how Maple can be useful in solving OR problems will find this an excellent reference. Maple's mathematical knowledge base now includes calculus, linear algebra, ordinary and partial differential equations, nwnber theory, logic, graph theory, combinatorics, statistics and transform methods. Although Maple's main strength lies in its ability to perform symbolic manipulations, it also has a substantial knowledge of a large nwnber of nwnerical methods and can plot many different types of attractive-looking two-dimensional and three-dimensional graphs. After almost two decades of continuous improvement of its mathematical capabilities, Maple can now boast a user base of more than 300,000 academics, researchers and students in different areas of mathematics, science and engineering.

From reader reviews:

Jessica Jennings:

The feeling that you get from Interactive Operations Research with Maple: Methods and Models is a more deep you searching the information that hide within the words the more you get serious about reading it. It doesn't mean that this book is hard to be aware of but Interactive Operations Research with Maple: Methods and Models giving you buzz feeling of reading. The article author conveys their point in specific way that can be understood by simply anyone who read the idea because the author of this e-book is well-known enough. This particular book also makes your vocabulary increase well. Making it easy to understand then can go along, both in printed or e-book style are available. We recommend you for having this particular Interactive Operations Research with Maple: Methods and Models instantly.

Dustin Broach:

Often the book Interactive Operations Research with Maple: Methods and Models will bring that you the new experience of reading some sort of book. The author style to clarify the idea is very unique. If you try to find new book to see, this book very appropriate to you. The book Interactive Operations Research with Maple: Methods and Models is much recommended to you you just read. You can also get the e-book from the official web site, so you can quickly to read the book.

Tanya McGaha:

Reading can called mind hangout, why? Because when you find yourself reading a book mainly book entitled Interactive Operations Research with Maple: Methods and Models your thoughts will drift away trough every dimension, wandering in every aspect that maybe unknown for but surely will become your mind friends. Imaging every word written in a e-book then become one type conclusion and explanation that maybe you never get just before. The Interactive Operations Research with Maple: Methods and Models giving you another experience more than blown away your head but also giving you useful facts for your better life with this era. So now let us teach you the relaxing pattern here is your body and mind are going to be pleased when you are finished examining it, like winning a game. Do you want to try this extraordinary shelling out spare time activity?

Arthur Fabry:

That reserve can make you to feel relax. This specific book Interactive Operations Research with Maple: Methods and Models was colourful and of course has pictures on the website. As we know that book Interactive Operations Research with Maple: Methods and Models has many kinds or type. Start from kids until youngsters. For example Naruto or Detective Conan you can read and feel that you are the character on there. Therefore not at all of book are usually make you bored, any it makes you feel happy, fun and chill out. Try to choose the best book to suit your needs and try to like reading which.
