## Cerebral Herniation Syndromes and Intracranial Hypertension (Updates in Neurocritical Care)

When the brain suffers an injury, the effects can be delayed and unpredictable. Cerebrospinal fluid can slowly build up, causing dangerously high levels of intracranial pressure (ICP), and the brain tissue can be displaced into adjacent compartments, resulting in cerebral herniation syndrome (CHS). Within the burgeoning field of neurocritical care, experts are just beginning to understand the nuanced, sometimes counterintuitive relationship between ICP and CHS.

Written by leading researchers who also have extensive first-hand clinical experience treating brain injury patients, *Cerebral Herniation Syndromes and Intracranial Hypertension* provides an up-to-date guide to this complex aspect of neurocritical care. Drawing from expertise gained working in high-volume medical centers, the book's contributors reveal that there is no universal metric for gauging acceptable levels of intracranial pressure. Instead, they demonstrate the best practices for offering patients individualized care, based on their specific conditions and manifest symptoms.

Bringing together internationally-renowned neurocritical care experts from a variety of neurology, critical care, surgery, and neurosurgery disciplines, this volume takes a comprehensive look at a complicated issue. A concise, practical, and timely review, *Cerebral Herniation Syndromes and Intracranial Hypertension* offers vital information for all medical personnel concerned with improving neurocritical patient care.

### **From reader reviews:**

#### **William Perez:**

This book entitled Cerebral Herniation Syndromes and Intracranial Hypertension (Updates in Neurocritical Care) to be one of several books which best seller in this year, that's because when you read this guide you can get a lot of benefit into it. You will easily to buy this book in the book retailer or you can order it by way of online. The publisher with this book sells the e-book too. It makes you more easily to read this book, because you can read this book in your Mobile phone. So there is no reason to your account to past this e-book from your list.

#### **Rose Cordeiro:**

The book Cerebral Herniation Syndromes and Intracranial Hypertension (Updates in Neurocritical Care) will bring one to the new experience of reading the book. The author style to elucidate the idea is very unique. If you try to find new book to see, this book very ideal to you. The book Cerebral Herniation Syndromes and Intracranial Hypertension (Updates in Neurocritical Care) is much recommended to you to read. You can also get the e-book through the official web site, so you can more readily to read the book.

#### **Hilary Williams:**

In this age globalization it is important to someone to get information. The information will make professionals understand the condition of the world. The condition of the world makes the information simpler to share. You can find a lot of recommendations to get information example: internet, magazine, book, and soon. You will see that now, a lot of publisher in which print many kinds of book. The book that recommended to you is Cerebral Herniation Syndromes and Intracranial Hypertension (Updates in Neurocritical Care) this guide consist a lot of the information in the condition of this world now. This specific book was represented how does the world has grown up. The dialect styles that writer value to explain it is easy to understand. Often the writer made some study when he makes this book. Honestly, that is why this book suited all of you.

#### **Candace Arroyo:**

Reading a guide make you to get more knowledge from this. You can take knowledge and information from a book. Book is written or printed or illustrated from each source that filled update of news. With this modern era like currently, many ways to get information are available for you actually. From media social including newspaper, magazines, science reserve, encyclopedia, reference book, new and comic. You can add your understanding by that book. Are you ready to spend your spare time to spread out your book? Or just seeking the Cerebral Herniation Syndromes and Intracranial Hypertension (Updates in Neurocritical Care) when you essential it?
