Evaluation of the Tricon Retained Soil Wall System (Technical Evaluation Report) Not Available

This report describes a HITEC evaluation designed to determine the basic capabilities and limitations of the Tricon System for use as a technically viable precast MSE retaining wall system. The evaluation was conducted based on material, design, construction, performance, and quality assurance information outlined in the HITEC Protocol. The Tricon System features rectangular segmental precast concrete facing panels and galvanized welded wire, grid-type soil reinforcement.
