Tomorrow's Gold: Asia's age of discovery Marc Faber

Renowned investment advisor Marc Faber sets out to find tomorrow's gold: the outperforming asset classes of the future. Far from being a sensational reading of the runes, this book delves deep into the past, to chart how old investor trends developed and assess how new patterns might emerge. Change is the thread. As Faber points out, the world is experiencing a transformation as great as Europe's late-15th Century golden age of discovery and the Industrial Revolution of the 19th Century events that altered the commercial face of the Earth forever.

And from this dramatic landscape a world in which economic, social and political conditions are morphing at an alarming rate Faber identifies investment opportunities.

Asia's three-billion-strong population will have a profound effect on the world, writes Faber, cautioning that today's richest cities and clusters of wealth are unlikely to retain their exalted positions in the future.
