I've used every Microsoft Operating System (OS) since the days of MS-DOS in the 1980's and over the years I've seen huge improvements in usability and design. I would never have imagined how far PC's have come since then. However, looking back there were a few bumps along the road, with Windows Vista and more recently Windows 8 being some of the least popular versions of the OS. Vista was a visually stunning OS let down by poor performance on a wide range of hardware, while Windows 8 was a radical redesign that never really took off. Microsoft's mission with Windows 10 is to combine the best features of Windows 7 and 8 to give the 1.5 billion Windows Users around the world a reason to upgrade. The return of the Start menu is a good beginning, but Windows 10 offers so much more. Designed to help you get up to speed quickly, this guide is a collection of the best 100 tips that I have found for Windows 10. Because Windows 10 is built for both touchscreen and traditional computing devices I have included both touchscreen gesture and keyboard/mouse instructions. Also, as a bonus extra, I have included a list of the most common Windows 10 Keyboard Shortcuts. This handy reference is divided into several categories to help you quickly find the shortcut you need, when you need it.
