Linux Multimedia Guide Jeff Tranter

Linux is increasingly popular among computer enthusiasts of all types, and one of the applications where it is flourishing is multimedia. Take a low-cost hardware platform and add the Linux operating system, which really exploits its speed, and you have a great host for developing multimedia applications. These often can be ported to other UNIX systems, increasing their value. Another attraction comes in the form of a great variety of free software packages that support manipulation of graphics, audio, and video, the best of which are described in this book. But it's not simple to put multimedia together on Linux, and there are few packages that integrate everything for you. Instead, you are handed programming interfaces and stand-alone utilities that are each suited for a particular job. In this book, Jeff Tranter offers the guidance you need to fit the pieces together, concentrating on how to program each kind of device. Part of the book is aimed at C programmers. Handling sound cards and CD-ROMS is not too difficult if you understand the standard interfaces. The book also describes tools that nonprogrammers can use. Sample multimedia applications are also shown. Contents include:

- Introduction to multimedia and the devices that Linux supports
- Configuration and use of sound cards, CD-ROMs, and joysticks
- Applications for sound and music, graphics, video, and games
- Programming devices such as sound cards and CD-ROMs
- Overview of graphical toolkits and APIs

From reader reviews:

Chris Gibbons:

What do you with regards to book? It is not important to you? Or just adding material when you need something to explain what the ones you have problem? How about your free time? Or are you busy individual? If you don't have spare time to do others business, it is give you a sense of feeling bored faster. And you have extra time? What did you do? Every person has many questions above. They need to answer that question since just their can do which. It said that about reserve. Book is familiar in each person. Yes, it is appropriate. Because start from on pre-school until university need this specific Linux Multimedia Guide to read.

David Hoag:

Playing with family inside a park, coming to see the ocean world or hanging out with good friends is thing that usually you could have done when you have spare time, after that why you don't try issue that really opposite from that. A single activity that make you not experience tired but still relaxing, trilling like on roller coaster you have been ride on and with addition associated with. Even you love Linux Multimedia Guide, you may enjoy both. It is excellent combination right, you still need to miss it? What kind of hang-out type is it? Oh can occur its mind hangout people. What? Still don't obtain it, oh come on its identified as reading friends.

Harry Fulford:

Beside that Linux Multimedia Guide in your phone, it could give you a way to get nearer to the new knowledge or info. The information and the knowledge you might got here is fresh from your oven so don't possibly be worry if you feel like an old people live in narrow small town. It is good thing to have Linux Multimedia Guide because this book offers for your requirements readable information. Do you at times have book but you would not get what it's facts concerning. Oh come on, that would not happen if you have this with your hand. The Enjoyable option here cannot be questionable, such as treasuring beautiful island. Techniques you still want to miss this? Find this book in addition to read it from today!

Gary Games:

As a pupil exactly feel bored to be able to reading. If their teacher expected them to go to the library or make summary for some book, they are complained. Just tiny students that has reading's soul or real their passion. They just do what the instructor want, like asked to the library. They go to right now there but nothing reading critically. Any students feel that reading is not important, boring in addition to can't see colorful pictures on there. Yeah, it is to become complicated. Book is very important to suit your needs. As we know that on this period of time, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. So , this Linux Multimedia Guide can make you sense more interested to read.
